

Model MAC Series Air Cleaners

Breathe Healthier

**Remove Harmful
Particulates From
Indoor Air.**

**Installing a quality GeneralAire®
Air Cleaner can reduce allergy and
asthma symptoms and improve
other chronic health conditions
adversely affected by harmful
particulates in your home's air.**

NEW!

How the MAC Air Cleaner Works:

Air passes through your new MAC Air Cleaner where particulates are captured within the fibers of the filter media. The air leaving your MAC Air Cleaner is healthier and safer for your family.

Details inside or go to: www.generalfilters.com/MACseries

Install an air cleaner in your home to:

Reduce Allergy Symptoms:

Pollen is a major allergen that can cause miserable symptoms such as a runny nose, itchy eyes, sneezing and more. Skin flakes, urine and saliva from pets can all become airborne. MAC Air Cleaners remove all these and more.

Improve Your Health:

Studies show poor indoor air quality is linked to heart disease, high blood pressure, cancer, diabetes, asthma, Alzheimer's, and many more chronic diseases. Ensure good health with a quality air cleaner.

Why Whole-House Air Cleaners Vs Portable Room Units?

See the top reasons below why a whole-house air cleaner is a better option for your home than a portable room unit:

	<i>GeneralAire® Whole House MAC Air Cleaner</i>	<i>Portable Air Cleaner Units</i>
Controls humidity in every room of your house	Yes. You will benefit from proper air treatment throughout your home.	No. You'll need to purchase a unit for every room in your house.
Quiet Operation	Yes. Your system will be so quiet you'll forget it's there.	No. Portable units are noisy and take up space in your rooms.
Minimal Maintenance	Yes. Simply change the air filter media once every 6 months	No. Filters must be replaced on a shorter term basis.

Selecting an Air Cleaner

There are several considerations when selecting an air cleaner:

1. Size of your home.
2. Number of HVAC systems in your home.
3. Your risk factors (pets, living near a busy highway, indoor smoking, pollen, hobbies that utilize chemicals, remodeling projects, use of pesticides).
4. Operation costs.
5. Special projects (home renovations can create extra dust and other particulates that float in the air).
6. Maintenance requirements.

GeneralAire® offers a full line of residential whole house air cleaners to meet your needs. Review our full product catalogue on www.generalaire.com to learn more. We recommend speaking with a licensed contractor for assistance with your IAQ selections and installations. Use our "Find a Contractor" tool on www.generalfilters.com for a list of contractors in your area.

The Benefits of Air Cleaning

Today homes are more airtight and energy efficient than ever. As a result, we trap potentially irritating and harmful substances and other irritants inside our homes. Studies of indoor air have found that air inside the home can be as much as 100 times more polluted than outdoor air. With the MAC Series Air Cleaners you can feel confident that you and your family will be breathing in only fresh, clean air all year round.

Studies show poor indoor air quality has been linked to chronic diseases such as diabetes, asthma, allergies, cancer, Alzheimer's disease, heart disease, high blood pressure, weight gain, and respiratory infections.

Environmental Protection Agency studies show we spend as much as 90% of our time indoors. Indoor air pollution is among the top five environmental health risks. In fact, indoor air can be up to 100 times more polluted than the air we breathe outdoors.
